

Beauty in Brick

- twenty-five Brick Homes
and how to build them

Beauty in Brick

“**F**OR human habitations no material has ever approached brick as a material both practical and beautiful. Having gone through the fire during its making, its resistance to that destroyer is unsurpassed. The atmospheric conditions that cause wood to rot, stone to flake off or stain, stucco to crack or discolor, paint to wear off and metal to corrode are the same agents that willingly and graciously mellow and harmonize a brick wall through the passing years into a masterpiece of texture and color. The possibilities for building beautifully with brick which men have appreciated for six thousand years are to-day at the command of any who can afford to build at all.”

—Garden & Home Builder.

The FINZER BROS. CLAY CO.

How You Can Save \$20.00 Before You Start to Build!

This book contains reproductions from actual photographs of twenty-five face brick homes which proved most popular during the past year.

We are ready to furnish working plans for any of the houses shown in this book. These plans are complete in every detail comprising *two sets of Blue-Print Working Plans*; *one Classified Guide* for listing all material items; *one set of Specifications* and *two Blank Contract Forms*. These will be sent to you complete upon receipt of your check for twenty dollars.

After you have purchased your brick for the construction of your home, send us the coupon on the last page of this book certifying that you have purchased Clinton Face Brick for its construction and we will refund to you the twenty dollars paid for the plans.

Thus you save twenty dollars or the cost of your plans before you actually start to build.

How You Can Save Money After You Build

The more permanent the construction of your house, the less depreciation it will have and the less expense you will have for upkeep and repairs.

With a Clinton Face Brick Home there is little or no depreciation for five or ten years and a very low rate thereafter. Your insurance rates will be lower than on a frame house and your painting costs reduced to a minimum. The resale value of a brick home is always high. Thus you will still save money even after your home is built.

See Page 31

CLINTON FACE BRICK

Four inches of color, of solid, never fading, weather and fire resisting color. Color with the texture of velvet, with the warmth of tone that only nature herself can provide. Beautiful reds, rich browns, gunmetals, grays and buffs, burned from clays that have made the region famous for the beauty and perfection of its product; designed and molded by people who have made brickmaking a life study.

That's Clinton Face Brick

Your home, built of Clinton Brick, will be a lasting satisfaction. Its superior construction will be a constant source of pride. You will have the assurance of its safety from fire hazards. Its beauty will be permanent and its freedom from upkeep costs will mean the saving of many, many dollars during your life in your home.

A Clinton Face Brick Home has no "surface to save"—its surface is four inches thick, all solid color. A Clinton Face Brick

Home always retains a high resale value because of its permanency of beauty and construction.

What About the Cost?

This is what we want you to ask us about. Send us blue-prints of the house you are planning to build of some other material and let us figure the cost of the brick for you and put you in touch with the dealer who can supply you with Finzer Brothers Face Brick. You'll find the cost less than you imagine.

Range of Colors

The illustrations on page 30 show the color range of Finzer Brothers Face Brick.

The **FINZER BROS. CLAY CO.**
Sugarcreek "The Clay City" Ohio

6 Rooms and Bath

"The ANNA LEE"

26 Ft. Wide x 26 Ft. Deep

IT is the kind of a home you find on long shady streets tucked in among the trees. There, or in the open the "Anna Lee" is a charming sight. And there is plenty of space and comfort inside. Kitchen cabinets, a medicine cabinet and a towel case are among the conveniences. All rooms are large and comfortable.

CLINTON FACE BRICK HOMES

6 Rooms, Bath and Den

"The AVONMORE"

29 Ft. 6 In. Wide x 29 Ft. Deep

THE "Avonmore" is a model home of graceful proportion, beauty, and distinction. The architect used extreme care in giving this design all the essential conveniences and comforts so much desired by the modern home builders. A careful study of the plans and picture will reveal many admirable features.

SIZES:

Extreme Width	40' 6"

CLINTON FACE BRICK HOMES

6 Rooms and Bath

"The ADOLPHUS"

26 Ft. Wide x 28 Ft. Deep

NEXT to the consideration of quality and comfort, continuous satisfaction is most important. That is a home must wear well and not lose its charm in the first year. The "Adolphus" possessing an exceedingly tasty and artistic exterior should be a permanent source of pleasure. The interior is equally fresh and attractive.

FEATURES

Steel Sash, Tile Roof, Face Brick Walls, Stucco and Half Timbered Gable.

CLINTON FACE BRICK HOMES

6 Rooms, Bath and Dining Nook

"The ARMINGTON"

33 ft. 6 in wide x 27 ft. deep.

SIZES:

Extreme Width	36'0"
Extreme Depth	32'0"
First Floor Ceiling	8'6"
Second Floor Ceiling	8'0"
Basement Ceiling	7'0"

THE picture tells the story. A beautiful and substantial home of solid brick outside walls with face brick for exterior surface. A well designed home to last for generations. An abundance of helpful sunshine is provided by the generous use of steel sash throughout the entire structure.

6 Rooms, Bath and Solarium

"The ALLENBURG"

38 Ft. Wide x 24 Ft. Deep

THE Dutch Colonial style carried out in brick proves to be very effective as shown here. By placing a pergola at one end and the solarium at the other, the architect has achieved perfect balance. You can visualize the effect of the combined living room and solarium from the floor plan, and you may rest assured that it is delightful. Also note the large chamber with fireplace and door opening to the upper deck. This home is a splendid illustration of well laid face brick.

CLINTON FACE BRICK HOMES

6 Rooms and Bath

"The ASSUMPTION"

26 Ft. Wide x 30 Ft. Deep

A VARIETY of materials give the above home a rich and interesting appearance. So carefully has the architect portioned his stone, face brick and stucco that no one material predominates leaving an harmonious whole. The tile roof caps it all in grand style. On the inside we find the same luxuriousness in the broad sweep of the rooms and the abundance of sunlight. A built-in telephone cabinet is featured.

CLINTON FACE BRICK HOMES

5 Rooms, Bath and Dining Nook

"The ALCINO"

38 Ft. Wide x 34 Ft. Deep

FIRST there is the veranda and majestically arched entrance. Then there is the commodious living room with its arched ceiling. From the living room you wander through the home at will, delighted at every turn. Neat dressing cabinets equipped with space saving closet fixtures replace clumsy closets.

A beautiful example of mingled shades of face brick carefully blended to produce an everlasting harmonious color scheme.

SIZES:

Extreme Width	40' 0"
Extreme Depth	40' 6"
Main Floor Ceiling (Living Room 10' 9")	
Balance	8' 6"
Basement Ceiling	7' 0"

5 Rooms, Bath and Solarium

"The ARCHBOLD"

29 Ft. Wide x 46 Ft. Deep

ORNAMENTATION can be either rich or gingerbreadly depending upon the taste of the user. No one can deny the richness of the "Archbold" nor can anyone accuse it of garishness. Face brick, stone trimming, leaded glass, tile roof, all are used in the correct relation to produce a harmonious whole. The architect has exercised good taste on the inside as well.

THE ILLUSTRATED PICTURES IN THIS BOOK ARE PHOTOGRAPHS OF THE ACTUAL HOME AFTER ERECTION.

CLINTON FACE BRICK HOMES

So that purchasers of CLINTON FACE BRICK can talk to contractors, architects and builders more intelligently regarding brick and brick construction we offer the information contained on this page for which we are indebted to the American Face Brick Association.

BRICK BONDS

Two terms are constantly recurring, in dealing with brick bond, "stretcher" and "header." When a brick is laid lengthwise of the wall, thus showing its long, narrow dimension or "face" on the surface, it is called a stretcher. If its length extends back into the wall so that its short dimension shows on the surface, it is called a header. The stretcher secures strength in the length of the wall. The header serves to form the transverse bond, that is, the strength of the wall throughout its thickness. When a brick is broken, as the case may require, the fragment is called a "bat."

Until comparatively recent times, brick bond was used only structurally, that is, to secure the strength of the wall as a solid mass, but in the seventeenth century European builders began to see an artistic possibility in the bond as it appeared on the surface. They began to see the fine tracery of the mortar joint running over the background of the brick, which could be varied into attractive patterns by different arrangement of the brick bond. As a consequence, there have been developed, in the main, three different types of bond which are used at the present day, with various modifications, to secure attractive effects in pattern.

MORTAR JOINTS

In dealing with the mortar joint, various elements must be carefully considered. Its color and texture, its size, and its kind. The color of the mortar joint may be such as entirely to destroy the beauty of the brick. On the other hand, if it is properly chosen, it will bring out the fine shades and tones of the brick in such a way as to enhance very greatly their natural beauty. Then, the mortar joint has a certain texture which is produced either by finishing it rough or smoothing it with the trowel or a tool made for that purpose. This mere treatment of the surface of the mortar joint has much to do with the appearance of the wall. In addition to that, the size of the mortar joint, running from a thin "battered" joint up to as much as an inch, naturally affects the color relation of the whole surface; and the kind of joint, whether cut flush, raked out, or tooled in various shapes, has a distinct bearing on the whole effect. Never decide on a mortar joint until you thoroughly talk it over with a face brick salesman. He will have valuable suggestions to make.

Mortar Joints
